Jiffy; J-2000 STEAMER Directions

1. Attach hose firmly with included assembly wrench, which is magnetized and located on the bottom of the unit. Assemble and attach hose hanger rod set. Every Jiffy® Steamer has been factory tested and it is not uncommon for small amounts of water to be in the unit.

Figure 1

2. Invert water caddy filled with distilled or tap water, plug into proper voltage outlet, turn switch to lighted ON position and you will have steam within minutes. Never substitute the Jiffy® Steamer water caddy.

3. For easy operation, mount optional Jiffy® Steamboard to door or wall to hold clothing while steaming (figure #2). For hanging garments without optional Jiffy® Steamboard, simply install an eye screw or nail to inside of a doorway or directly onto a wall or you may use your steamer's rod set as shown in figure 3. Touch material lightly with steaming head and wrinkles will vanish instantly. The combined touch of the steaming head and the direct steam is very important. Some articles can be steamed better from the underneath side. Speed and efficiency is accomplished with a little practice. Always steam with hose in an upright position, so any condensation is free to flow back into steamer. If steaming in a low position near floor, straighten hose up and out frequently to keep clear of condensation. DO NOT ALLOW STEAMER TO RUN DRY.

Figure 2

4. Hang steam head in an upright position in the hose hanger section when not in use and turn switch to OFF (figure #3).

5. Periodically, pour old water out of steamer to avoid sediment buildup and maintain proper water level (figure #4). Remove hard water deposits with Jiffy® Liquid Cleaner. Wipe water cup out with a hand towel. See page 28 for complete cleaning instructions.

Figure 4

NOTE: No two water supplies have the same mineral content. If your steamer begins to cut on and off during normal use, the thermostat is indicating the heating unit needs the sediment cleaned out.

WARNING: Never operate without water. Unplug after each use.
